[About Achievement Clicker:](#)

[It's name explains anything. You need to click each time for one achievement. This genre is a pure cash grab. Don't waste your money to get some silly ABCD achievements. Also you can't remove the earned achievements if you decide you don't want fake numbers.](#)

[I don't recommend purchasing.. HECKING AMAZING. If you had preordered this game on console, you got The Nioh Set, and Golden Nioh sets as armors that you could redeem via the boon option. You can still get the Golden Nioh set by grinding. However, I preferred the regular Nioh set through the game, as well as the axe and katana I got from using it on PlayStation 4.. After finding that in this "complete" edition that I can't get what I want, what is left is just a very grindy game that half combines Diablo elements with Dark Souls elements.](#)

[If you want me to review the game all I can really say is that it's okay, but it's incredibly repetitive.](#)

[Don't expect a character creation screen or a name screen. You have William, William, William, and William. \(Nioh 2 is going to have character creation!\)](#)

[There are different ways to play the game, and there is a decent selection of weapons.](#)

[The same levels, enemies, and bosses are reused over and over and over again.](#)

[The gameplay is fun until it's not. I wanted to pick it up on pc to play it again in the future with friends, but I regret that decision.. I feel this game has too many bad reviews, that don't do it justice.](#)

[The gameplay is excellent. It's similar to freelancer, but with inertia and glide/slide mechanics. It's a joy to pilot the fighter!](#)

[Sure it could be longer and have more options, ships and whatnot, but then it wouldn't have this price tag.](#)

[Great dogfights, varied mission objectives. Hope they make a second one!. Similar to its counterparts, a fun way to waste an hour.. Character is well made, but its not suppose to be dlc as all the other games had bardock, ran into a bug during the story mode that broke the game.. \\$10 at launch is a real good price. There's not a lot of bells and whistles apart from the netplay but the game is exactly what it says on the box. The lobby arrangement of It's Been a Long Time Since We Passed Through Space Time! is also very good.](#)

[I am very bad at this game, thanks for listening to my story.. A clean, classy, Super Monkey Ball inspired work of art with huge open levels and a relaxing design. At times it makes my PC tank \(largely because my pc is♥♥♥♥♥♥, but it is very fun nonetheless. I definately recomend it for any fan of rolling platformers.](#)

(a foot on a chair) You summon and kill... (kicks chair away) Summon and kill... (walks forward) I fail to see the logic here. (turns around, holds his fist near his face) Is sanity the price to pay... For power?!

i got this dlc with the deluxe edition sadly. Other than the backwards cab view every time I try to shunt the transport cars they derail. not matter the speed or anything i do they derail every single time. Nice super hard platformer with clear simple UI. All killer no filler. The generous fast respawns mean that you can die 50 times on the same segment and not have it take forever. The difficulty curve is very nice and when you finally pass a bit, you feel that you finally perfected your game and have the urge to try the next segment. And an awesome soundtrack keeps you in the groove.

. Fun game, well done for an indie game. Good graphics and sound, fun to play and quite challenging. Those llamas are driving me crazy. This game is pretty similar to triple town so I don't think the concept is original, but it doesn't feel as repetitive as I expected. boss fight, bonus stage, survival mode and shop. I can guess this is a ported mobile app game, which I don't really like playing because most of casual games bores me. but hey, this is pretty good and I'm surprised myself. I bought this as soon as it came out hoping this will be "LOLO series (NES)" -ish. didn't watch the video, I was wrong but I don't regret the purchase, it's a good way to refresh your mind.

Graphics: 8.5

I respect the devs for its clean mixed 2d for gameplay visual and 3d menu. style is cute. for every detail, yes, I do notice them, they are appreciated.

Sound: 6.5

Average, It's not something that you'll remember, not catchy, but also not something you'll hate.

Gameplay: 7

As I mentioned before, concept is not original but improvised in its own way so it's good. one of the casual games I'd like to spend my time with. I had most fun with survival mode as the you don't need to say goodbye to your "evolved mammoth" every level.

Customer Support: 10

Found a bug and reported it. was fixed 2 days later. best support I have ever experienced.

Overall rating: 8.0

This is a good game to refresh your mind.

One of the best casual games out there.. Got thru it but it was not easy. You need to use the ghost a couple of time by throwing through or over and i could not do it. After 20 attempts I had to cheat and walk thru walls to get the ghost to where I wanted it. Glad I finished it but it was a pain over all.. I bought this game for about 10 bucks (one copy for a friend of mine, one for me), expecting it to be a great co-op and PvP game, after reading the glowing reviews and the way it is advertised on Steam.

What can i say? Don't bother. There's a good game in there but you can hardly play it. The first thing i noticed were input and settings related bugs. Then crashes. But worst of all, no servers and the inability to actually create a co-op room and invite you friends (remember, it was advertised to have this feature).

If you're lucky, you may still find a dedicated server, which most likely will be empty. If you create your own lobby, you will be unable to invite your friends and your friends won't be able to see it in the server browser (we tried it, multiple times and with multiple settings/solutions).

The only way to play this online, is to get into one of the two empty servers i have found and let your friend join them too. The downside is, you can't select the game mode or map and you most likely end up in opposing teams (1vs1 basically).

It's a shame, really, because the game itself promotes to be fun. I don't care if this was released on 2011. It's still sold and advertised on steam and i expect the advertised features to work. It may be "just" 10 bucks, but i want it back anyway.

This game is the straw that broke the camel's back and i will refrain from buying anything on steam for a while.. This game as a really bad issue with steam vr, it's the third time i try to play a level and it went to making steam vr crash, it has done it around a dozen times already. please fix the issue. A bit racist and weird, but it's okay.
